AMENDMENTAssistant Commissioner for Patents  
Washington, D.C. 20231

Sir:

In response to the Office Action of July 23, 2002, amendment to the above-identified patent application is requested.

In the Claims

Please substitute the following amended claim 50:

50. (Three Times Amended) An ambulatory orthosis system, the ambulatory orthosis system comprising:

a display,

a support portion that fits around a joint and is carried by the patient during activities and a sensor on the support portion, and

a controller operably connected to the sensor, wherein the controller controls the display based on signals from the sensor, and

wherein the patient, flexing the joint, causes a cursor movement on the display, in which the motion of the cursor is correlated with motion or strain of the joint as detected by the sensor
